<i>Problem Title</i>	Throwing away chocolate and toffee wrappers is an environmental problem
<i>Problem Description</i>	<p>In our class and in all other classes as well, students eat chocolate, toffee and throw the wrappers in the zone that comforts them. To add to this, my small research on such wrappers says that most of them are either non-recyclable or take very long time to degrade.</p> <p>It is a serious concern to the environment and we need to find a solution to it.</p>
